About Me

Passionate B.Tech CSE student at Central University of Punjab with experience in frontend development and Python-based backends. Keen interest in Machine Learning and LLM integration, currently developing projects that combine web interfaces with AI capabilities.

Skills

Languages: C, C++, Python, JavaScript

Web: HTML, CSS, JS, React.js, FastAPI

AI/ML: Scikit-learn, Pandas, Numpy, LLM APIs

Tools and Databases: Git, GitHub, Figma, Streamlit, SQL

Projects

College Queries Chatbot : Developed a rule-based chatbot in React.js handling college queries — admissions, fees, and general info .

[GitHub](#) [Live Demo](#)

Notes App : Built a Notes application in React.js with full CRUD functionality and persistent data storage using Local Storage.

[GitHub](#) [Live Demo](#)

Student Performance Predictor : Built a Linear Regression model achieving R^2 of 0.98, deployed as an interactive web app using Streamlit.
