PROFESSIONAL SUMMARY

B.Tech Computer Science student specializing in full-stack development and AI-powered systems. Experienced in React.js, FastAPI, Python, Machine Learning, and LLM APIs with hands-on experience building end-to-end intelligent applications. Currently exploring advanced AI concepts such as Retrieval-Augmented Generation (RAG) and LLM-based architectures. Seeking opportunities in Full Stack Development and AI/ML Engineering roles.

EDUCATION

Central University of Punjab

Bachelor of Technology in Computer Science & Engineering

- CGPA: 8.47/10

Bathinda, Punjab

2024 – Present

Govt. Sr. Sec. School, Guhla Kaithal

Senior Secondary (Class XII) – Science

- Percentage: 93.60%

Haryana

2023 – 2024

EXPERIENCE

AI Intern (Applied LLM Systems)

Centre for Applied and Responsible AI (CARA), RV University, Bengaluru

June 2026 – Present

Remote

- Working on practical problems such as hallucination detection and data leakage prevention in LLM applications under Faculty mentorship.
- Contributing to system design, experimentation, and evaluation of LLM outputs using structured test cases, while developing prototype solutions to improve reliability, safety, and response quality.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript

Web Development: HTML, CSS, React.js, FastAPI, Streamlit, REST APIs, JSON

AI / GenAI: Machine Learning, LLM APIs (OpenAI/Gemini), Prompt Engineering, RAG, Embeddings

Data Science: Scikit-learn, Pandas, NumPy, Seaborn, Matplotlib, Plotly

Tools & Databases: Git, GitHub, MySQL, Figma, Vercel, Render, Netlify

PROJECTS

AI Career Recommender & Job Guidance Platform | *React, FastAPI, ML, LLM*

[GitHub](#) — [Live Demo](#)

- Built AI-based career guidance system integrating ML model (72% accuracy) and LLM APIs for personalized recommendations and roadmaps with 3s response time across 10+ career paths using adaptive quiz inputs.
- Developed AI Resume Analyzer providing ATS score prediction, skill gap analysis, and actionable improvement suggestions using LLMs.

AI Trip Planner | *Python, Streamlit, LLM, APIs*

[GitHub](#) — [Live Demo](#)

- Built in collaboration with a peer, handling Streamlit frontend and backend development with AI integration, developing an AI-powered travel planner generating personalized itineraries for 10+ day trips with budget optimization.
- Integrated 4+ APIs including Weather, Hotel, Flights, and Maps for real-time data and route visualization.

Personal Portfolio Website | *HTML, CSS, JavaScript*

[GitHub](#) — [Live Demo](#)

- Designed responsive portfolio website showcasing projects, skills, and achievements with cross-browser compatibility and clean UI.

CERTIFICATIONS

Artificial Intelligence Primer Certification | *Infosys Springboard*

April 2026

Data Analytics Job Simulation | *Deloitte Forage*

March 2026

Machine Learning Workshop | *TechFest, IIT Bombay*

December 2025

ACHIEVEMENTS

- Solved 130+ Data Structures and Algorithms problems on LeetCode and GFG using C++. [LeetCode](#)
- Maintaining a strong CGPA of 8.47/10 in B.Tech Computer Science Engineering and active member of Academic Alliance Club, supporting peer learning activities.
